

CASITRON

A Constellation Financial Software Company

Portfolio management software designed to grow with your business

Cost effective & complete solution

- Handles fixed rate leases, conditional sales, and loan contracts for vehicles or equipment
- Weekly, Bi-weekly, Twice Monthly, Monthly, Quarterly, Semi-Annual, Annual and Seasonal Payment Frequencies
- Covers entire process from booking and funding through contract management to contract termination and asset sale.

Batch processes to efficiently run day-to-day business without users having to do repetitive tasks.

Easy to use

- User enters a few data elements and the system creates pre-configured entries to the General Ledger
- Automation of repetitive tasks
- Application can be interfaced with any front-end system that can pass data in XML format – or integrate through our API

• Fully Integrated General Ledger (only one in North America).
• Solid accounting that doesn't require a CPA to understand.

Scalable and secure

- Data housed in a high-security, fully redundant data facility
- Oracle database in the backend
- Fully functional Disaster Recovery site on standby

• Low implementation costs; no upfront license fee.
• No need to hire systems and database admins.
